**1- Print this document** format A4 (please notice: printing option "scale" must be on "none")

**2- check it out:** those two lines on the right should measure on paper respectively 50 mm (5 cm) in length and 2 inches

**3- Now you can** place one of your rings on the paper to find your size

**Without printing :** measure the diameter in millimeters (**D:** \_\_, \_\_ mm) of a ring you already have that fit the finger you like and find your size number in the circles above (ex: number 21 = )

**Without a ring to measure:** get a flexible measuring tape and measure the circumference of your finger in millimeters (**C:** \_\_, \_\_ mm)

\*please notice that those measures are an approximation, and that slight variations in the order of decimals numbers is normal and acceptable in an hand made piece

**n°**= number

**21**

**D** = diameter

**C** = circumference
